

Abstract Template for Methods and Techniques in Phonetics Sciences (MaTiPS) 2026

Author Full Name¹, Co-author Full Name²

¹Affiliation

²Affiliation

Author 1 email address, Author 2 email address

General format. This is the template for MaTiPS 2026 conference abstracts. Abstracts may be up to 2 A4-size pages long, including text, figures, tables, and references. The top matter (title, authors, affiliations, email addresses) must be formatted as in this template (the number of lines needed for the top matter will depend on the length of the title and the number of authors). The beginning of the abstract must be separated from the top matter by a blank line. All text should be in Times New Roman font. The title is 14-point font, all other text is 12-point font. Margins are 25 mm (.98") top and bottom, and 20 mm (.79") left and right. Footers and headers are not allowed. Do not use page numbers.

All abstracts must be submitted in PDF format in compliance with the provided template. The PDF file name should be structured as follows:

MaTiPS2026_<presentation preference, i.e. Poster or Tutorial>_<1st author's last name>_<short title without spaces, e.g. AbstractTemplate>.pdf

For example: MaTiPS2026_Poster_Lulich_AbstractTemplate.pdf

Headings. Headings are in bold font with the first word capitalized and the rest of the heading in lower case. Text follows without line break. No sub-headings.

Figures and tables. Figures and tables should be of high visual quality. No screenshots. Tables should be created directly within the template.

References

References should start on the line immediately after the **References** header, and should be formatted with hanging indentation. Use a consistent format for references and inline citations.
